

The Basic Graded Package consists of the following:

- Social Security Verification
- County Criminal 7-year History
- A Motor Vehicle Search
- A Patriot Act Search

How the process works:

1. The contractor company orders the searches through the council website once the account with First Advantage is set-up. An online account must also be set up with the council. To open your account go to our website www.cscbrazosport.org, print an online account form, fill out and fax to us. We will then call you to set the account up.
2. Once ordered the Council places a code on the training badge (04SSV/BCG) indicating that a basic package background screen has been ordered.
3. The results are retrieved by the contractor company on the First Advantage website not the councils.
4. After results are retrieved, the contractor company compares results to the matrix furnished by the owner of the facility they are requiring entry into. The Safety Council cannot view results nor can they database the results only the entry that one was performed.
5. Owner facilities audit contractors by the First Advantage web site. Owners can view background screens for compliance as long as Owner facility has approval from contractor. This approval is obtained for owners here at the council anytime a contractor takes the site specific.
